

# DODGE® Inserts

## Ultrasert I

Thread sizes: 4-40 thru 1/4-28, M3 thru M6  
Tapered body  
Provides ease of positioning into molded hole  
Provides excellent alignment  
Vertical flutes provide high torque resistance  
Stepped ribs provide optimum tensile strength

## Ultrasert II

Thread sizes: 0-80 thru 3/8, M2 thru M10  
Tapered body  
Provides ease of positioning into molded hole  
Provides excellent alignment  
Diagonal knurls provide torque resistance  
Undercuts provide pullout resistance  
Available with screw-lock feature for vibration applications

## Ultrasert III

Thread sizes: 2-56 thru 1/4, M2 thru M6  
Double ended  
Lead-in pilots on both ends  
Excellent for high production  
Can be used with automation feeders  
Diagonal knurls for torque resistance  
Undercuts provide tensile strength
