

# Dodge® Inserts

## **Ultrasert IV**

Thread sizes: 2-56 thru 3/8, M2 thru M10

Straight body

Excellent for straight or drilled holes

Lead-in pilot for easy alignment

Diagonal knurls provide torque resistance

Undercuts provide tensile strength

## **Flanged Ultrasert IV**

Thread sizes: 2-56 thru 3/8, M2 thru M10

Has flange on one end

Provides larger bearing surface

Provides high pull out strength when used in reverse screw entry, i.e. screw enters from end opposite of flange

Provides electrical contact when required

## **Ultraseal**

Available with pipe threads, 1/8, 1/4, & 3/8 NPTF

Has high temperature o-ring to provide positive seal between insert and parent material

Eliminates need to mold or machine threads

Installs like standard insert
