

# DODGE® Insert

## Ultra-Mold

Thread sizes: 8-32 thru 3/8, M4 thru M10

Two piece design provides full thread to bottom of insert with minimum length

Controlled minor diameter reduces movement during molding

Unique counterbore provides accurate positioning with molding pin maintaining accurate alignment for assembly

Can also be installed like standard insert

UltraMold Conventional

## Miniature Inserts

Thread size: M1.6

Available in both double ended and flanged versions

## TaperTuff

Thread sizes: 2-56 thru 5/16, M2 thru M8

Tapered body allows quick easy orientation

Entire length of insert is in contact with hole during installation

Full contact assures optimum pullout and rotational strength
